ANAÏS LOHIER

anais.lohier@yale.edu • (510) 230-9323 • anais-lohier.com • linkedin.com/in/anaislohier9323

EDUCATION

Yale University — **New Haven, CT**
M.S. in Public Health, Concentration in Health Informatics — August 2025 – May 2027

California Polytechnic State University — **San Luis Obispo, CA**
B.S. in Business, Concentration in Quantitative Analysis, *Minors in Biology and French* — August 2022 – June 2025

Semester at Sea (SAS) — **Europe, Africa, and Asia**
Voyage 132 – Global Study Abroad Program — September 2023 – December 2023

WORK & RESEARCH EXPERIENCE

Yale School of Public Health – Department of Biostatistics — **New Haven, CT**
Teaching Fellow, Clinical and Translational Informatics — September 2026 – Present

- Evaluate graduate coursework in biomedical informatics, clinical decision-making, and health information systems.

Yale School of Medicine – Clinical Informatics — **New Haven, CT**
Graduate Research Assistant — January 2026 – Present

- Conducting clinical observations with Dr. Ritchie Verma's general internal medicine team, tracing diagnostic reasoning and information exchange across bedside encounters, rounds, and handoffs
- Developing a master's thesis under Dr. David Chartash using qualitative analysis and information modeling to examine how clinical findings acquire meaning and lose context, uncertainty, or rationale through documentation

Yale School of Medicine – Dr. Arnaud Augert's Lab — **New Haven, CT**
Graduate Research Assistant — February 2026 – Present

- Modeling SCLC subtype identity as continuous transcriptomic states to investigate cellular plasticity
- Building Linux-based RNA-seq pipelines with applied training in single-cell RNA-seq and CRISPR screen analysis

Microsoft – Murdoch Services Inc. — **Remote**
Data Analyst Intern — June 2024 – May 2025

- Developed AI models to automate medical document processing, reducing review time and error rates by 40%
- Built automated workflows and dashboards using Power BI and Dataverse to streamline reporting

GreenLight Ag. – Agritech Start-up — **Richmond, CA**
AI Data Engineering Intern — June 2021 – August 2021

- Trained AI in crop and weed differentiation through machine learning, running 12 in-field rover experiments with data processing and statistical sampling

LEADERSHIP & INVOLVEMENT

HAVEN Student-Led Free Clinic — **New Haven, CT**
Volunteer, Quality Assurance & Quality Improvement — May 2026 – Present

- Developing standardized quality improvement metrics to track performance across 20 departments

Statistics in the Community – Manos Juntos Free Clinic — **New Haven, CT**
Healthcare Analytics Consultant — February 2026 – June 2026

- Built a Flask app integrating medication spend, demand forecasting, and budget projection for inventory planning
- Analyzed medication ordering and patient data to evaluate cost and usage trends

Student Managed Portfolio Project — **San Luis Obispo, CA**
Quantitative Data Analyst, Healthcare & Technology — September 2024 – June 2025

- Managed $1.6M healthcare portfolio, analyzing performance using statistical and financial modeling
- Presented data-driven recommendations to 120+ faculty and peers on portfolio optimization

SELECTED RESEARCH PROJECTS

- Lohier, A., Campbell, A. G., & Chartash, D. (2026). *Normative Temperature, Demographic Categories, and the Limits of Infrared Thermometry*. medRxiv. https://doi.org/10.64898/2026.10.19.26365925
- Lohier, A., Verma, R., & Chartash, D. (2026). *The Making of Clinical Information: A Qualitative Study of How Information Is Interpreted and Documented in an Academic Health System*. Manuscript in preparation.

SKILLS

Technical Skills: Python, R, Linux, Excel, multivariate and Bayesian statistics, applied data analysis, machine learning
Interests: Clinical informatics, biomedical data science, healthcare data analytics, biomedical engineering
Languages: Fluent in French and English, Proficient in Spanish
