EDUCATION

Yale University <i>M.Sc. in Public Health, Concentration in Health Informatics</i>	New Haven, CT August 2025 – May 2027
California Polytechnic State University <i>B.S. in Business, Concentration in Quantitative Analysis, Minors in Biology and French</i>	San Luis Obispo, CA August 2022 – June 2025
Semester at Sea (SAS) <i>Voyage 132 – Global Study Abroad Program</i>	Europe, Africa, and Asia September 2023 – December 2023

WORK & RESEARCH EXPERIENCE

Yale School of Medicine – The Augert Lab <i>Graduate Research Assistant</i>	New Haven, CT February 2026 – Present
- Modeling SCLC subtype identity as continuous transcriptomic states to investigate cellular plasticity. - Building Linux-based RNA-seq pipelines with applied training in single-cell RNA-seq and CRISPR screen analysis.	
Yale School of Medicine – Clinical Informatics <i>Graduate Research Assistant</i>	New Haven, CT January 2026 – Present
- Reviewed literature spanning medical classification philosophy, diagnostic error, and clinical measurement. - Participated in a clinical observership in General Internal Medicine at Yale New Haven Hospital examining how bedside judgment is translated into structured documentation.	
Microsoft – Murdoch Services Inc. <i>Data Analyst Intern</i>	Remote June 2024 – May 2025
- Developed AI models to automate medical document processing, reducing review time and error rates by 40%. - Designed automated workflows and dashboards using Microsoft Power Suite to streamline data handling. - Created an interactive data system with Dataverse and Excel, improving reporting efficiency.	
GreenLight Ag. – Agritech Start-up <i>AI Data Engineering Intern</i>	Richmond, CA June 2021 – August 2021
Trained AI in crop and weed differentiation through machine learning, running 12 in-field rover experiments with data processing and statistical sampling.	
Mathnasium – Math Learning Center <i>Academic Instructor</i>	Berkeley, CA July 2021 – August 2022
- Taught 75+ students (Pre-K–Pre-Calculus), increasing math comprehension by 94% and grades by 88%. - Oversaw grading, data tracking, and academic progress reporting for all students.	

LEADERSHIP & INVOLVEMENT

HAVEN Free Clinic <i>Volunteer, Quality Assurance & Quality Improvement</i>	New Haven, CT February 2026 – Present
Supported project-based quality improvement initiatives across clinic departments, analyzing care processes and clinical outcomes to drive operational improvements.	
Statistics in the Community – Manos Juntos Free Clinic <i>Healthcare Analytics Consultant</i>	New Haven, CT February 2026 – Present
- Built a Flask app integrating medication spend, demand forecasting, and budget projection for inventory planning. - Analyzed medication ordering and patient data to evaluate cost and usage trends.	
Student Managed Portfolio Project <i>Quantitative Data Analyst, Healthcare & Technology</i>	San Luis Obispo, CA September 2024 – June 2025
- Managed \$1.6M healthcare portfolio, analyzing performance using statistical and financial modeling. - Presented data-driven recommendations to 120+ faculty and peers on portfolio optimization.	

SELECTED PUBLICATIONS

Lohier, A., Chartash, D., Campbell, A. (in preparation). *Normative Temperature, Demographic Categories, and the Limits of Infrared Thermometry*. Manuscript submitted to IOP Journal of Physiological Measurement.

SKILLS

Technical Skills: Python, R, Linux, Excel, multivariate statistics, applied data analysis, machine learning
Interests: Computational biology, clinical informatics, biomedical data science, healthcare data analytics
Languages: Fluent in French and English, Proficient in Spanish
